

UNIVERSITY *of the*
WESTERN CAPE

The Division for Postgraduate Studies (DPCS) and the
eResearch Office
Presents:

BASICS OF R: TRAINING MODULE

The purpose of this training module is to introduce students to the basics concepts and skills of R. R is a programming language widely used by researchers in various disciplines for data manipulation, calculation and graphical display. Postgraduate students who would like to begin working with R as part of their research or skills development will benefit from this training module

05 JULY, 13:00 -14:00
